

Tarmika Bridge

is a single-entry quoting solution designed to streamline the commercial lines process.

Tarmika Bridge is the industry's leading commercial lines quoting tool, with over 35 commercial markets integrated via Ivans/IDP to automate the appetite and quoting process. The single-entry solution enables agents to collect data, find in-appetite markets and submit to markets all in one system to create a simple, connected commercial lines quoting experience.

With built-in integration capabilities with Applied Epic™, the Bridge provides core capabilities to quote small commercial business directly with their appointed carriers and through Market Access.

By enabling agents to collect and store data, find in-appetite markets, quote and submit to multiple insurers or MGAs in a single workflow, agents create a simpler,

more connected commercial lines quoting experience that improves productivity and speed to market.

Tarmika Bridge is a seamless quoting platform built for independent agents that streamlines the quoting process allowing agencies to work better, save time, and increase efficiencies.

Allows your agency to

- Streamline the quoting process by quoting multiple lines of business to multiple carriers using a single-entry solution
- Simplify commercial submissions with standardized business classifications and reduced question sets
- Grow commercial lines business by eliminating the need to rekey data entry and quote multiple insurers or MGAs in a single workflow

“Tarmika has absolutely changed the game for our agency. By allowing us to quote and bind in under 5 minutes, it puts us miles ahead of our competition.”

– Bradley Flowers, Founder, Portal Insurance

Core Capabilities

Market Appetite Visibility

Feel confident with accurate and automated market appetites. A classification search powered by Ask Kodiak communicates markets' appetite into the Bridge to dynamically update in-appetite markets within the submission workflow.

Simplify Commercial Submissions

Submit to several markets at once, with some guidance. Dynamic Carrier Selection uses the selected business classification to show which markets are available for submission automatically.

Quote + Bind

Simplify the quoting process. Bindable, comparative rates from appointed insurers are displayed following a quote submission allowing agent to bridge data to insurer portals to finish the process.

ACORD Form Generation

Generate pre-filled ACORDs using quoting data captured in the Bridge without any duplicate entry.

Dynamic Question Set

Save time submitting to multiple markets. The Bridge features a dynamic question set that removes and remaps duplicate underwriting questions from the flow to allow agents to answer a single question once per submission.

On average, it takes an agent less than 10 minutes to complete the quote flow and submit, across all lines, regardless of the number of markets being submitted to.
